Acid Electric Furnace Slag Control 322
Bibliography 334

Acid Open Hearth:
Casting Heat, Slag Viscosity in 1125
for Steel, Composition of Working Hearth for 60-ton 1109
Furnace Life 1128
Steel, Charging Methods for 1111
Steel, Lime Additions to Slags for 1117
Steel, Making Final Addition to and Finishing Heat of ..1118, 1119
Steel Melting, Bibliography of 1129
Steel Melting, Carbon Drop Rate in 1116
Steel, Pig Iron for 1110
Steel, Slag Control of 1121

Acid Refractories for Steel Ladles 804
Air Blast and Airless Blast Cleaning 501
Air Drying on Properties of Steel Foundry Molding Sands, Effect of 353
Air Hardening Properties of Secondary Aluminum 775
Airless Blast Cleaning, Air Blast and 501
Alloy Cast Irons, Effect of Superheating, Pouring Temperatures and Microstructure on the Elastic Properties of Some Plain and 451
Alloy Requirements, Secondary Aluminum 767

Alloys:
Affecting Graphitization (*See Graphitization*)
For Navy Use, Special Steels and 1217
Furnaces for Monel and Special 1213

Aluminum:
Air Hardening Properties of Secondary 775
Alloy Castings, Salvage and Reclamation by Welding of 271
for Sand Castings, Secondary 766

Analysis:
Job 1239
of Base Silica Sand, Screen 978
of Sea Coal 881

Annealing:
Cycle, Atmospheres Required in 97
Cycle, Causes of Decarburization During First and Second Stages of 99, 100
Cycle in Dressler Kiln for Malleable Iron, Methods of Varying. 62
Cycles, Typical for Floor-Type Ovens with Castings Packed or Unpacked 46
of Malleable Iron, Atmospheres and the 95
of Malleable Iron, Electric Furnace 67

Annealing:—*continued* *Page*
of Malleable Iron, Gas Generation Equipment for Furnaces for 105
of Malleable Iron, Temperature Control in 126
of Malleable Iron in Dressler or Tunnel-Type Kiln 50
Ovens, Car Type Periodic Pot 47
Ovens, Periodic Muffle-Type 48
Pots, Effect of Oxygen in Malleable Iron 16
Pots, Periodic Malleable 44
of White Cast Iron, Effect of Composition on 30

Apparatus for Measuring Deflection of Cast Iron Bars under Transverse Loading 455
Apparatus Used in Determination of Combined Carbon in Cast Iron and Steel 934

Apprentice:
Related Instruction for Foundry 527
Schedule of Processes for Foundry 520
Training in Wartime at Bethlehem Steel Co. 515

Apprenticeship Program for Technical Graduates 972
ArmaSteel Castings, Gating Malleable and 568
Arrested Anneal, Graphitization by 83
As Cast and Machined Nickel-Copper-Chromium Cast Iron, Transverse Strength of 821
Atmosphere on Dry Strength of Steel Foundry Sands, Effect of .. 355
Atmospheres and the Annealing of Malleable Iron 95
Atmospheric Pressure and the Steel Casting—A New Technique in Gating and Risering 215

Austenitic:
Cast Iron, Effects of Ladle Inoculation on an 815

B

Basic Electric Furnace, Making Steel for Navy Castings in the ..1211
Basic Electric Steel Melting 381
Basic Refractories for Steel 804

Bentonite:
and Fire-Clay Bonded Sands, Effect of Agent Used on 939
as a Bond for Foundry Sand 1261
Content on Flowability of Foundry Sand, Effect of Variation of 644

Bethlehem Steel Co., Apprentice Training at 516

Bibliography on:
Acid Electric Furnace Slag Control 334
Acid Open-Hearth Steel Melting 1129
Cast Iron for Glass Forming Molds 310
Cast Iron Strength vs. Structure 1096
Center-line Shrinkage in Steel Castings 710
Corrosion of Cast Steels 929
Durability Tests of Foundry Sands 560
Effects of Hydrogen on Malleableization 125
Elastic Properties of Cast Iron 484
Flowability of Foundry Sands 653
Graphitization of White Cast Iron as Affected by Copper 1058
Graphitization Principles 20

Bibliography on:—*continued* *Page*
Growth of Cast Iron 442
Ladle Inoculation of Cast Iron 827
Radiographic Inspection 450
Resin Bonded Sands 374
Statistical Control of Foundry Operations 634
Suppression of Graphitization by Supercooling 29
Welding Steel Castings 1026

Blast Cleaning, Air Blast and Airless 501
Blow Holes, Vents and Cores for Core Blowing, Arrangement of .. 1134
Blows in Malleable Castings, Chill 588

Bonds (*See Clays and Sands*):

Brass and Bronze, and How to Eliminate Them, Some Causes of Gas Unsoundness in 490
Brazil, Some Aspects of Cast Iron Practice in 185

Brazilian:
Foundry, A Multipurpose 180
Foundry Industry, Comments on 172
Foundry Production, Designing for 149

Breakdown Tests of Sands with Various Bonds 1286
Bricks, Tests on Steel Ladle Sleeve 805
Bronze and Brass, and How to Eliminate Them, Some Causes of Gas Unsoundness in 490
Buckles, Rat-tails and Scabs as Affected by Clay Bond 1266
Bureau of Standards Cast Iron and Steel Samples 932

C

Carbon:
Drop Rate in Acid Open-Hearth Steel Melting 1116
in Cast Iron and Steel, Determination of Combined 931
Monoxide in Brass and Bronze 492
Steel, Experimental Results on Welding Plain 1004
Steel Castings, Hardness Surveys of Welded Plain 1006
Steel Castings by the Metal Arc Process, Welding of Medium .. 995
Steel Melting, Low 385

Cast Iron:
after Cycle Heating to 1472°F., Growth of 423
after Exposure to 1472°F., Oxygen Content of 433
Apparatus Used in Determination of Combined Carbon in Steel and 934
as Affected by Copper, Bibliography on Graphitization of White 1058
As Cast and Machined, Nickel-Copper-Chromium 821
Bars under Transverse Loading, Apparatus for Measuring Deflection of 455
Before and After Heat Treatment in Air, Total, Graphitic and Combined Carbon Contents of 902
Bibliography on Elastic Properties of 484
Bibliography on Growth of 442
Bibliography on Ladle Inoculation of 827
Chart, Suggested Cell Size of 1072
Correlation of Structural Classification with Tensile and Transverse Strengths of 1086
Effects of Ladle Inoculation on an Austenitic 815
Effect of Phosphorus on the Growth of Gray 895

Cast Iron:—*continued* *Page*
Effect of Superheating, Pouring Temperatures and Microstructure on the Elastic Properties of Some Plain and Alloy .. 451
Graphitization Formation Mechanism in 1065
Graphitization Tests of White 1033
Hardness of 471
Ladle Inoculated Austenitic and High Test 825
Methods for Determining Cell Size of 1070
Microscopic Examination of 471
Microstructure vs. Properties of Austenitic 823
Minimum Malleableizing Cycles for Various Combinations of Factors in Graphitizing White 1056

Molds for Glass Forming 287
Bibliography 310

Optical Pyrometer Recording of Temperature Measurement of.1172
Practice in Brazil, Some Aspects of 185
Relative Moduli of Elasticity and Rupture of 461
Resilience of 466
Samples, Bureau of Standards 932
Stream, Temperature Measurement Record of Molten 1162
Strength vs. Structure 1058
Suggested Methods for Comparing Graphite Flake Size of 1068
Temperature Measurement, Rayotube and Pyrometer for 1163
Tensile Bars, Composition of White 1033
to Resist Deterioration at High Temperatures, Machinable 1.5 and 2.0 Per Cent Chromium 405
to Resist High Temperatures, Ladle Additions for 408
Widmanstätten Structure of 477

Cast Irons, Austenitic Nickel-Copper-Chromium 816
Cast Irons Classified, Chemical Analysis of 1076

Casting:
Cleaning in a Gray Iron Foundry 499
Design, General 149
Design as Affecting Durability of Clay Bond 1264
Qualities as Affected by Sand Conditions 1270

Castings, Secondary Aluminum for Sand 766
Cell Size of Cast Iron, Methods for Determining 1070

Center-line Shrinkage in Steel Castings, Studies on 657
Test Specimens for 670
Tests, Analysis of Steel Used in 667
X-ray 673

Cereal Binders on Drying-out Rate of Synthetic Sands, Effect of .. 944
Charging Methods for Acid Open-Hearth Steel 1111
Chemical Analysis of Cast Irons, Classified 1076
Chemical and Physical Properties of Converter Steel 393
Chill Blows in Malleable Castings 588
Chromium on Growth Phenomena, Causes of Growth and Influence of 425
Chromium-Nickel-Copper Cast Irons, Austenitic 816
Classifications with Tensile and Transverse Strengths of Cast Iron, Correlation of Structural 1086
Clay Additions Made to Sands to Maintain Green Compression Strength 552
Clay Bond Properties, Investigation of 1257
Cleaning in Gray Iron Foundry, Air Blast and Airless Blast 501

Page
College Graduate Looks at the Foundry Industry 961

Committee Report on:
Cooperation with Engineering Schools 953
Magnetic Powder Testing for Steel Castings 1242
Radiography of Steel Castings 446
Sintering Test of Foundry Sands 785

Composition, Design and Types of Core Blowing Boxes 260, 261
Compression Strength of Sands vs. Ramming Energy, Dry 990
Compression Tests of Foundry Sand, Data on 645

Contraction:
and Expansion of Mixtures for Copper Pattern Production 397
of Core Sand Mixtures with Various Additions of Silica Flour and Iron Oxide 1192
of Foundry Sands for Steel and Iron, Expansion and 365

Control of Foundry Operations, Statistical Methods as an Aid to .. 611
Converter Steel Practice, Side Blow 381

Copper:
Bibliography on Graphitization of White Cast Iron as Affected by 1058
-Chromium-Nickel Cast Iron, Austenitic 816
Content on Low Temperature Pretreatment of Some White Irons on Malleableization, Effect of 1032
Pattern Production, Plaster Mixtures for 396
Patterns by Electro-Forming 394

Core:
Blowing, Arrangement of Cores, Blow Holes and Vents for ...1134
Blowing Boxes, Composition, Design and Types of 260, 261
Blowing, Glossary of Terms for 1149
Blowing Machine, Design of Core Boxes and Driers for 260
Mixtures, Physical Properties of 1188
Mixtures, Use of Hot Strength Test as a Tool for Controlling..1185
Sand, Cost Comparison of Sea Coal, Natural Molding Sand, Bentonite Bond and 842
Sand Mixtures for Malleable Castings 590
Sand Mixtures with Various Additions of Silica Flour and Iron Oxide, Expansion and Contraction of 1192
Sand Specimens, Ramming Effect on 346

Cores:
Blow Holes and Vents for Core Blowing, Arrangement of 1134
Dilatometer Furnace for Hot Strength of 1188
Effects of Iron Oxide Additions on Hot Strength of 1190

Corrosion Test for High Alloy Steel Castings 918

Cost:
Comparison in Cleaning Castings 506
Comparison of Natural Bonded Sands vs. Synthetic 843
Control for Steel Foundries, Grinding Wheel 595
Problems Created by the War Effort 1198
vs. Grade of Pattern Lumber 868

Costs:
and the Defense Program, Foundry 1202
Depreciation as Affecting Foundry 1200
in Dressler Kiln, Annealing 65

Page
Crucible Furnaces for Brass and Bronze 495
Cupola Charge Sheet for Converter Steel Practice 388
Cupola Rayotube for Cast Iron Temperature Measurement at 1166

D

Decarburization During First and Second Stages of Annealing Cycle, Causes of 99, 100
Defects in Castings Caused by Bonds 1267
Defects in Castings Caused by Improper Use of Sea Coal 885
Defects in Malleable Castings, Prevention of Slag 569
Deflection of Cast Iron Bars under Transverse Loading, Apparatus for Measuring 455
Density, Green Permeability of Sands vs. 984
Depreciation as Affecting Foundry Costs 1200

Design:
as Affecting Durability of Clay Bond, Casting 1264
of Core Boxes and Driers for Core Blowing Machines 260
of Steel Ladle Nozzles 809

Designing for Foundry Production 149
Dilatometer Furnace for Hot Strength of Cores 1188
Directional Solidification in Steel Castings 658
Dressler Tunnel-Type Kiln for Malleable Annealing 50
Driers for Core Blowing Boxes, Construction and Design of ..260, 263
Dry Compression Strength of Sands vs. Ramming Energy 990
Dry Strength of Steel Foundry Sands, Effect of Atmosphere on .. 355
Drying for Large Castings, Mold 1230
Drying Temperatures on Steel Foundry Sands, Effect of 349

Durability:
Factors, Comparison of 1274
of Clay Bond, Casting Design as Affecting 1264
of Naturally-Bonded and Synthetic Molding Sands by Repeated Pour Test, Progress Report on 539
Tests of Foundry Sands, Bibliography on 560

E

Elastic Properties of Some Plain and Alloy Cast Irons 451
Elasticity of Cast Irons, Relative Modulus of 461

Electric Furnace:
Annealing of Malleable Iron 67
Lining and Preheating of Steel Melting 392
Making Steel for Navy Castings in the Basic.... 1211
Slag Control, Acid 322
Steel Melting, Basic 381

Electro-Forming, Copper Patterns by 394
Elevated Temperatures, Equipment for Measuring Gas Evolution of Foundry Sands when Heated to 368
Emissivity Chart of Optical Pyrometer for Temperature Measurement 1176
Engineering Graduates in the Foundry 970
Engineering Schools, Report of Survey of Foundry Instruction in.. 953

Page

Equipment for:
Gas Generation in Malleable Annealing Furnaces 105
Measuring Gas Evolution of Foundry Sands when Heated to Elevated Temperatures 368
Radiographic Inspection, X-ray 449
Ramming Sand Test Mold 542
Testing Clay Bond 1259

Expansion:
and Contraction of Core Sand Mixtures with Various Additions of Silica Flour and Iron Oxide 1192
and Contraction of Foundry Sands for Steel and Iron 365
and Contraction of Mixtures for Copper Pattern Production .. 397
and Shrinkage of Pattern Lumber 869

F

Fire Clay and Bentonite Bonded Sands, Effect of Wetting Agents Used on 939
Firing Periodic Malleable Annealing Furnaces 45
Flake Size of Cast Irons, Suggested Methods for Comparing Graphite 1068
Flowability of Foundry Sands, A Study of 637
Flowability of Sands with Various Bonds 1283
Fluidity Test for Steel 693
Foremen to Teach, Teaching 1239

Foundry:
Costs and the Defense Program 1202
Engineering Graduates in the 970
Foreman in Malleable Foundry, Daily Routine of 591
Industry, College Graduate Looks at the 961
Need for Technical Men in the 971
Operations, Statistical Methods as an Aid to Control of 611
Sand Research Subcommittee on Sintering Test, Report of 785
Training, Proportion of Students Receiving Elementary 956

Foundryman, Lumber for Patternmaker and 861
Fuel Oil and Sea Coal in Molding Sand 878
Fuels for Dressler Tunnel-Type Malleable Annealing Kiln 51

Furnace:
Control for Brass and Bronze, Crucible 495
Control of Heats in Steel 1217
for Annealing of Malleable Iron, Batch-Type Electric 74, 92
for Annealing of Malleable Iron, Continuous Electric 68, 93
for Annealing of Malleable Iron, Dressler Tunnel-Type Kiln.. 50
for Annealing of Malleable Iron, Electric 67
for Annealing of Malleable and Pearlitic Malleable Iron, Elevator-Type Electric 76
for Annealing of Malleable Iron, Roller Hearth Gas-Electric. 72
for Brass and Bronze, Water Formed in Gas-Fired 494
for Hot Strength of Cores, Dilatometer 1188
for Monel and Special Alloys 1213
Life, Acid Open-Hearth 1128
Lining and Preheating of Electric Steel 392
Making Steel for Navy Castings in the Basic Electric 1211
Periodic Malleable Annealing 39
Refractories for Steel Melting 1214
Slag Control, Acid Electric 322
Temperature Control of Pot-Type Graphitizing 126

Castings, Secondary Aluminum for 766
Control, Malleable Foundry 830
Cost Comparison on Core Sand, Sea Coal, Bentonite Bond and Natural Molding 842
Data on Compression Tests of Foundry 645
Effect of Atmosphere on Dry Strength of Steel Foundry 355
Effect of Ramming on Hot Strength of 992
Effect of Resin Binder Additions on the Properties of Molding 337
Effect of Variations of Bentonite Content on Flowability of Foundry 644
Grains, Fines and Coarse, Percentages of 840
Grains on Flowability, Effect of Variations in Size and Shape of 650
Hot Strength Tests of 982
Losses in Relation to Dry Shear Strength 1282
Mixtures for Malleable Castings 590
Mixtures Using Fuel Oil 887
Mixtures with Various Additions of Silica Flour and Iron Oxide, Expansion and Contraction of Core 1192
Molds of Large Castings, Heat Transfer in 1235
Permeability Machine Adapted to High Temperature Work on.. 979
Properties, Fuel Oil Effect on 888
Properties, Sea Coal Effect on 884
Room Temperature Tests of 983
Sea Coal in Foundry 841
Sintering Point vs. Shrinkage 798
Specimens, Formula for Total Ramming Energy Exerted on .. 981
Strength, Based on Certain Clays, Amount of Clay Required to Maintain 1273
Strengths With and Without Sea Coal, Comparison of 1281
Test Mold, Equipment for Ramming 542
Used for Cores, Grain Distribution of Silica 1186
vs. Density, Green Permeability of 984
vs. Ramming Energy, Dry Compression Strength of 990

Sands:
Bibliography on Durability Tests of Foundry 560
Bibliography on Resin Bonded 374
Comparison of Drying Rate of Various 948
Comparison of Green Strength Loss of 1271
Effect of Air Drying on Properties of Steel Foundry Molding.. 353
Effect of Cereal Binders on Drying-out Rate of Synthetic 944
Effect of Wetting Agents Used on Bentonite and Fire-Clay Bonded 939
Effects of Ramming on Mold Hardness of Steel Foundry 350
Effects of Ramming, Progress Report 977
Effects of Resin Binder Additions on Properties of Iron Foundry Molding 357
Effects of Resin Binder Additions on Properties of Steel Foundry Molding 343

Sands:—*continued* *Page*
Heated to Elevated Temperatures, Equipment for Measuring Gas Evolution of Foundry 368
Hot Strength Data on Steel Foundry 363
for Microscopic Examination, Mounting of 799
with Resin Binders, Hot Strength Tests of 359
Shock Heating of Steel and Iron 372
for Steel Castings, Properties of Molding 669
for Steel and Iron, Expansion and Contraction of Foundry 365
Study of Flowability of Foundry 637
Synthetic, Drying-out of 937
Used in Resin Binder Tests, Screen Analysis of 339
Various Permeabilities with Different Bonds for 1277
vs. Synthetic, Cost Comparison of Natural Bonded 843
with Various Bonds, Breakdown Tests of 1286
with Various Bonds, Flowability of 1283
with Various Bonds, Mulling Tests of 1287

Scabs, Buckles and Rat-tails as Affected by Clay Bond 1266
Schedule of Processes for Foundry Apprentices 520
Schools, Report of Survey of Foundry Instruction in Engineering.. 953

Sea Coal:
and Clay Bond 1260
Comparison of Sand Strengths with and without 1281
Cost Comparison of Core Sand, Natural Molding Sand, Bentonite Bond and 842
Effect on Sand Properties 884
and Fuel Oil in Molding Sand 878
in Sand 841
Selection and Analysis of 880, 881

Seasoning Lumber 864
Secondary Aluminum, Air Hardening Properties of 775
Secondary Aluminum, Magnesium Effect on 776
Section Thickness Effects on Center-line Shrinkage in Steel Castings 690
Shake-out of Castings 499
Shear Strength, Sand Losses in Relation to Dry 1282
Shock Heating of Steel and Iron Sands 372
Shrink and Shrink Cracks in Malleable Castings, Prevention of 570

Shrinkage:
and Expansion of Pattern Lumber 869
Sand Sintering Point vs. 798
in Steel Castings, Study of Center-line 657

Side Blow Converter Steel Practice 381
Sieverts' Diagram of Hydrogen Solubility in Pure Iron at Different Temperatures 110
Sintering Test, Report of Foundry Sand Research Subcommittee on 785

Slag:
Control, Acid Electric Furnace 322
Control of Acid Open-Hearth Steel 1121
Defects in Malleable Castings, Prevention of 569
Viscosity in Acid Open-Hearth Casting Heat 1125
Viscosity Measurement 323
